

Intellect Lab Revolutionizes Engineering & Manufacturing Services Market

Have you experienced the nightmare of not knowing the status on a job? Have you had to explain to other engineering houses how to do their job? Intellect Lab has been on your side of the fence. Our only goal is repeat business. To assure that we achieve this goal we have taken three important steps.

- ?? Intellect Lab is not made up of students; we are the professors. We have the best working for us.
- ?? Intellect Lab works with some of the top names in the industry, but we are always willing to work with small start-ups to help bring them to market.
- ?? We have defined the *Intellect Lab "12"*. These business practices will assure that our relationship will be truly magical.

Bay Area CyberRays Professional Soccer Team Helps Intellect Lab with our First Open House

On October 4th 2001, Intellect Lab had its first open house. The open house was held to introduce our abilities to companies in need of engineering and manufacturing services.

Attending the Open House was a virtual who's who of companies in Silicon Valley. The attendees were given a 30-minute presentation, factory tour and then got to meet our special guests. Sissi and Julie Murray of the WUSA 2001 Champion Bay Area Cyber Rays were on hand to sign Intellect Lab logo'd soccer balls and take photos with our guests.

In attendance were semiconductor companies such as Intel, ST Micro, and Analog Devices, medical companies such as Vidamed, and peripheral companies such as Sejin. 15 companies overall were represented.

To make sure that you are invited to our next invite-only open house in January, be sure to sign up for our open house mailing list at www.intellectlab.com. Do it now, as we keep attendance low to assure that the event is quality and not just quantity.

Contest: Go to www.intellectlab.com to win one of two soccer balls signed by Sissi and Jullie Murray of the Bay Area CyberRays
